

Are you worried about federal cuts to Medicaid?

Cuts to Medicaid would

Make it impossible for some seniors to remain in their nursing homes

Medicaid covers 5 in 8 nursing home residents.

Rob children of a healthy start

Medicaid covers 4 in 9 children and nearly half of all births.

Force New Yorkers to choose between food and health care

Cut services for many hospitals and clinics

Medicaid funds rural, suburban, and urban hospitals and community health centers.

Reduce access to life-saving treatments, such as cancer care

Take away services promoting mental health and wellbeing

Medicaid funds the majority of mental health and substance use care.

Increase health care costs and devastate the State budget

Leave those with disabilities without care

Medicaid covers 4 in 9 working adults with disabilities.

Many New Yorkers will lose coverage and will have to delay care, which can impact their quality of life, ability to work, and care for their families.

How **YOU** can make a difference and get involved:

- 1. Tell your story:** share how the Medicaid program has helped you or a loved one
bit.ly/CSSMedicaid
- 2. Protect access to care for ALL New Yorkers:** Reach out to key Members of Congress and tell them why they need to vote to save Medicaid
